

Aditya Mehta | Principal Consultant | Remote (India)

aditya.mehta@paritypartners.example

Principal Consultant with 16+ years building frontend systems across payments and core-banking and booking and network platforms. Core strengths: Node.js, TypeScript, MLflow, JavaScript. Has led delivery for regulated and high-scale clients, owning architecture, testing, CI/CD and mentoring. Comfortable in distributed, async teams and working directly with clients.

Skills: Node.js, TypeScript, MLflow, JavaScript, Next.js, React

Senior Frontend Engineer / Tech Lead, Meridian Pay (2022 - 2026). Cut infra cost by 20% by reworking the React layer and adding caching and async processing. Led incident response and on-call for a high-throughput service (1M+ daily requests). Built infrastructure-as-code and observability (dashboards, alerts, SLOs) for the platform. Partnered with the Meridian Pay product team to shape the roadmap and de-risk delivery. Hardened security and access control for Meridian Pay, including audit logging and secrets management.

Frontend Engineer, Cartwright & Co (2018 - 2022). Built infrastructure-as-code and observability (dashboards, alerts, SLOs) for the platform. Cut error rate by 35% by reworking the JavaScript layer and adding caching and async processing. Introduced CI/CD, trunk-based development and automated tests; deploys went from weekly to daily. Led incident response and on-call for a high-throughput service (2k req/s peak).

Frontend Engineer, Bharat Telecom (2014 - 2018). Mentored 2 engineers and ran internal guild sessions on Next.js. Designed and ran React/TypeScript microservices for Bharat Telecom's booking and network platforms platform, owning them from design to production. Introduced CI/CD, trunk-based development and automated tests; deploys went from weekly to daily. Built infrastructure-as-code and observability (dashboards, alerts, SLOs) for the platform.

Frontend Engineer, National Revenue Office (2010 - 2014). Cut infra cost by 40% by reworking the JavaScript layer and adding caching and async processing. Partnered with the National Revenue Office product team to shape the roadmap and de-risk delivery. Hardened security and access control for National Revenue Office, including audit logging and secrets management. Built infrastructure-as-code and observability (dashboards, alerts, SLOs) for the platform.

Projects: Re-platformed the reporting service using JavaScript and JavaScript (40% cost saving). Hardened the orders service using Next.js and TypeScript (1M+ users).
