

Curriculum Vitae - Aisha Sheikh

aisha.sheikh@paritypartners.example - Remote (India)

Education: B.Sc Computer Science, Manipal.

Summary. Senior Consultant with 7+ years building genai systems across citizen-facing digital services and clinical data platforms. Core strengths: Python, LLMs, RAG, vector search. Has led delivery for regulated and high-scale clients, owning architecture, testing, CI/CD and mentoring. Comfortable in distributed, async teams and working directly with clients.

Experience. Genai Engineer, Helix Health (2024 - 2026). Introduced CI/CD, trunk-based development and automated tests; deploys went from weekly to daily. Cut infra cost by 30% by reworking the vector search layer and adding caching and async processing. Built infrastructure-as-code and observability (dashboards, alerts, SLOs) for the platform. Mentored 4 engineers and ran internal guild sessions on FastAPI. Hardened security and access control for Helix Health, including audit logging and secrets management. Genai Engineer, Bharat Telecom (2022 - 2024). Introduced CI/CD, trunk-based development and automated tests; deploys went from weekly to daily. Hardened security and access control for Bharat Telecom, including audit logging and secrets management. Led incident response and on-call for a high-throughput service (1M+ daily requests). Drove a migration to LLMs with zero downtime across 2k req/s peak. Genai Engineer, Cobalt Capital (2019 - 2022). Built infrastructure-as-code and observability (dashboards, alerts, SLOs) for the platform. Designed and ran RAG/vector search microservices for Cobalt Capital's payments and core-banking platform, owning them from design to production. Led incident response and on-call for a high-throughput service (2k req/s peak). Drove a migration to Python with zero downtime across 2k req/s peak.

Selected projects. Built the payments service using FastAPI and vector search (1M+ users). Hardened the payments service using LLMs and vector search (40% cost saving).

Skills: Python, LLMs, RAG, vector search, FastAPI.
