

Curriculum Vitae - Naveen Joshi

naveen.joshi@paritypartners.example - Delhi NCR

Education: B.E. Computer Science, IIIT Hyderabad.

Summary. Principal Consultant with 17+ years building backend systems across clinical data platforms and clinical data platforms. Core strengths: Go, Docker, Prometheus, Spring Boot. Has led delivery for regulated and high-scale clients, owning architecture, testing, CI/CD and mentoring. Comfortable in distributed, async teams and working directly with clients.

Experience. Senior Backend Engineer / Tech Lead, Parity Partners (2022 - Present). Cut infra cost by 35% by reworking the AWS layer and adding caching and async processing. Designed and ran Java/Spring Boot microservices for SkyRoute Airlines's booking and network platforms platform, owning them from design to production. Hardened security and access control for SkyRoute Airlines, including audit logging and secrets management. Mentored 2 engineers and ran internal guild sessions on Prometheus. Introduced CI/CD, trunk-based development and automated tests; deploys went from weekly to daily. Backend Engineer, Cobalt Capital (2018 - 2022). Built infrastructure-as-code and observability (dashboards, alerts, SLOs) for the platform. Cut error rate by 40% by reworking the Go layer and adding caching and async processing. Drove a migration to Spring Boot with zero downtime across 1M+ daily requests. Designed and ran Go/Prometheus microservices for Cobalt Capital's payments and core-banking platform, owning them from design to production. Backend Engineer, Sterling Mutual (2014 - 2018). Cut infra cost by 30% by reworking the Prometheus layer and adding caching and async processing. Led incident response and on-call for a high-throughput service (2k req/s peak). Partnered with the Sterling Mutual product team to shape the roadmap and de-risk delivery. Designed and ran Go/Docker microservices for Sterling Mutual's payments and core-banking platform, owning them from design to production. Backend Engineer, National Revenue Office (2009 - 2014). Cut p99 latency by 30% by reworking the Go layer and adding caching and async processing. Designed and ran AWS/Java microservices for National Revenue Office's citizen-facing digital services platform, owning them from design to production. Partnered with the National Revenue Office product team to shape the roadmap and de-risk delivery. Mentored 4 engineers and ran internal guild sessions on Go.

Selected projects. Scaled the payments service using Prometheus and AWS (sub-100ms p99). Re-platformed the catalogue service using Spring Boot and Java (1M+ users).

Skills: Go, Docker, Prometheus, Spring Boot, AWS, Java.
