

Rohan Shah

Principal Consultant - Remote (India) - Chennai: no
rohan.shah@paritypartners.example - 14+ yrs experience

PROFILE

Principal Consultant with 14+ years building frontend systems across e-commerce and supply-chain and clinical data platforms. Core strengths: TypeScript, JavaScript, React, scikit-learn. Has led delivery for regulated and high-scale clients, owning architecture, testing, CI/CD and mentoring. Comfortable in distributed, async teams and working directly with clients.

SKILLS

Languages: TypeScript (working), JavaScript (learner), Kotlin (learner)
Frameworks: React (learner), Next.js (expert)
ML & AI: scikit-learn (working)

EXPERIENCE

Senior Frontend Engineer / Tech Lead - Parity Partners (2022 - Present)

- Introduced CI/CD, trunk-based development and automated tests; deploys went from weekly to daily.
- Designed and ran TypeScript/React microservices for Sterling Mutual's payments and core-banking platform, owning them from design to production.
- Mentored 4 engineers and ran internal guild sessions on Next.js.
- Partnered with the Sterling Mutual product team to shape the roadmap and de-risk delivery.
- Built infrastructure-as-code and observability (dashboards, alerts, SLOs) for the platform.

Frontend Engineer - Meridian Pay (2018 - 2022)

- Drove a migration to TypeScript with zero downtime across 2k req/s peak.
- Designed and ran React/JavaScript microservices for Meridian Pay's payments and core-banking platform, owning them from design to production.
- Built infrastructure-as-code and observability (dashboards, alerts, SLOs) for the platform.
- Hardened security and access control for Meridian Pay, including audit logging and secrets management.

Frontend Engineer - Voyantis Travel (2014 - 2018)

- Introduced CI/CD, trunk-based development and automated tests; deploys went from weekly to daily.
- Built infrastructure-as-code and observability (dashboards, alerts, SLOs) for the platform.
- Cut p99 latency by 40% by reworking the JavaScript layer and adding caching and async processing.
- Mentored 3 engineers and ran internal guild sessions on Next.js.

Frontend Engineer - Cobalt Capital (2012 - 2014)

- Led incident response and on-call for a high-throughput service (500k+ daily orders).
- Hardened security and access control for Cobalt Capital, including audit logging and secrets management.
- Cut infra cost by 30% by reworking the TypeScript layer and adding caching and async processing.
- Designed and ran JavaScript/Next.js microservices for Cobalt Capital's payments and core-banking platform, owning them from design to production.

SELECTED PROJECTS

- Hardened the payments service using JavaScript and Kotlin (zero-downtime cutover).
- Re-platformed the onboarding service using TypeScript and scikit-learn (40% cost saving).

EDUCATION

M.C.A., PES University | AWS Solutions Architect - Associate
