

Vikram Iyer | Senior Consultant | Bengaluru

vikram.iyer@paritypartners.example

Senior Consultant with 8+ years building backend systems across citizen-facing digital services and booking and network platforms. Core strengths: Kotlin, Java, Spring Boot, AWS. Has led delivery for regulated and high-scale clients, owning architecture, testing, CI/CD and mentoring. Comfortable in distributed, async teams and working directly with clients.

Skills: Kotlin, Java, Spring Boot, AWS

Backend Engineer, Saffron Bazaar (2023 - 2026). Mentored 3 engineers and ran internal guild sessions on Kotlin. Introduced CI/CD, trunk-based development and automated tests; deploys went from weekly to daily. Built infrastructure-as-code and observability (dashboards, alerts, SLOs) for the platform. Led incident response and on-call for a high-throughput service (1M+ daily requests). Designed and ran Kotlin/AWS microservices for Saffron Bazaar's e-commerce and supply-chain platform, owning them from design to production.

Backend Engineer, Trentbridge Bank (2020 - 2023). Hardened security and access control for Trentbridge Bank, including audit logging and secrets management. Cut infra cost by 35% by reworking the AWS layer and adding caching and async processing. Built infrastructure-as-code and observability (dashboards, alerts, SLOs) for the platform. Drove a migration to AWS with zero downtime across 500k+ daily orders.

Backend Engineer, Voyantis Travel (2018 - 2020). Partnered with the Voyantis Travel product team to shape the roadmap and de-risk delivery. Cut p99 latency by 30% by reworking the Spring Boot layer and adding caching and async processing. Built infrastructure-as-code and observability (dashboards, alerts, SLOs) for the platform. Drove a migration to Kotlin with zero downtime across 2k req/s peak.

Projects: Built the onboarding service using Spring Boot and Spring Boot (40% cost saving). Scaled the orders service using Kotlin and AWS (zero-downtime cutover).
